Hospital Inpatient Quality Reporting (IQR) and Medicare Promoting Interoperability Programs

Calendar Year (CY) 2027 Available Electronic Clinical Quality Measures (eCQMs)

For CY 2027 eCQM reporting, hospitals participating in the Hospital IQR Program* and the Medicare Promoting Interoperability Program** are required to successfully submit four quarters of data for six eCQMs selected by CMS and three self-selected eCQMs. The eCQMs selected by CMS are Safe Use of Opioids—Concurrent Prescribing; Cesarean Birth (Perinatal Care [PC]-02); Severe Obstetric Complications (PC-07); Hospital Harm-Severe Hypoglycemia (HH-HYPO); Hospital Harm-Severe Hyperglycemia (HH-HYPER); and Hospital Harm-Opioid-Related Adverse Events (HH-ORAE). The three self-selected eCQMs must come from the table below. Each quarter must contain the same nine eCQMs. The eCQMs must be the same eCQMs across quarters in a given reporting year.

Hospitals can use any combination of Quality Reporting Document Architecture (QRDA) Category I files, zero denominator declarations, and/or case threshold exemptions to reflect its total inpatient population. The data must be reported using the Office of the National Coordinator Health Information Technology certification criteria to meet the certified electronic health record technology (CEHRT) requirement.

The eCQM reporting deadline is **Monday, February 28, 2028, 11:59 p.m. Pacific Time**. For additional information, visit the QualityNet eCQMs Overview page and the eCQI Resource Center Hospital-Inpatient eCQMs page.

CMS-Selected **Safe Use of Opioids** *(CMS506v9)* Safe Use of Opioids—Concurrent Prescribing	**CMS-Selected** **PC-02** *(CMS334v8)* Cesarean Birth	**CMS-Selected** **PC-07** *(CMS1028v5)* Severe Obstetric Complications (This eCQM is a risk-adjusted measure.)
CMS-Selected **HH-HYPO** ***(CMS816v6)*** Hospital Harm—Severe Hypoglycemia	**CMS-Selected** **HH-HYPER** *(CMS871v6)* Hospital Harm—Severe Hyperglycemia	**CMS-Selected** **HH-ORAE** *(CMS819v5)* Hospital Harm—Opioid-Related Adverse Events
HH-AKI *(CMS832v4)* Hospital Harm—Acute Kidney Injury (This eCQM is a risk-adjusted measure.)	**HH-FI** *(CMS1017v3)* Hospital Harm—Falls with Injury (This eCQM is a risk-adjusted measure.)	**HH-RF** *(CMS1218v3)* Hospital Harm—Postoperative Respiratory Failure (This eCQM is a risk-adjusted measure.)
MCS *(CMS986v6)* Malnutrition Care Score	**VTE-1** *(CMS108v15)* Venous Thromboembolism Prophylaxis	**VTE-2** *(CMS190v15)* Intensive Care Unit Venous Thromboembolism Prophylaxis
STK-2 *(CMS104v15)* Discharged on Antithrombotic Therapy	**STK-3** *(CMS71v16)* Anticoagulation Therapy for Atrial Fibrillation/Flutter	**STK-5** *(CMS72v15)* Antithrombotic Therapy By End of Hospital Day 2
IP-ExRad *(CMS1074v4)* Excessive Radiation Dose or Inadequate Image Quality for Diagnostic Computed Tomography (CT) in Adults (Facility IQR)	**HH-PI** *(CMS826v4)* Hospital Harm—Pressure Injury	

*The submission of CY 2027 eCQM data will affect the fiscal year (FY) 2029 payment determination.
**The submission of CY 2027 eCQM data will affect FY 2029 payment determination for eligible hospitals and the FY 2027 payment determination for critical access hospitals (CAHs).
