Subject: Report Update: THA/TKA PRO-PM HSRs and Measure Details

CMS.gov | Hospital Quality Reporting

Announcement from the Centers for Medicare & Medicaid Services (CMS):

Following the release of Hospital-Specific Reports (HSR) and measure details in July 2026, issues were identified impacting the Total Hip Arthroplasty/Total Knee Arthroplasty (THA/TKA) Patient-Reported Outcome-Based Performance Measure (PRO-PM) reports. The issues have been resolved and updated HSRs and measure details are now available in the Hospital Quality Reporting (HQR) System.

Details on corrections are as follows:

- Eligible Procedure counts were given a value of 0 when there were in fact multiple eligible procedures. This issue has been corrected.
- The Case Mix specific report showed no results (e.g. "--" for every risk factor). This issue has been corrected.

Please note: Corrected publicly reported THA/TKA PRO-PM data will be available on the January 2027 Preview Report.

Please re-review or redownload your reports to view the updates. If issues persist, please contact CCSQ Service Center.
