Subject: 2022 Baseline HAI Measure Results Now Available in Preview Data

As part of the October 2026 Public Reporting Preview Period, on the Centers for Medicare & Medicaid Services [Hospital Quality Reporting](#) page, you can preview your hospital's standardized infection ratios calculated using the 2022 baseline for healthcare-associated infection (HAI) measures that will publicly appear on the Compare tool on [Medicare.gov](#) and the Data Catalog on [Data.cms.gov](#). The data reflect performance from Quarter 1 through Quarter 4 of Calendar Year 2025.

For more information about the HAI measures and 2022 baseline data, refer to the [HAI Overview](#) QualityNet page and the Centers for Disease Control and Prevention's [Education & Analysis Resources](#) page. Submit questions to the Inpatient and Outpatient Healthcare Quality Systems Development and Program Support Contract Team via the [QualityNet Question and Answer Tool](#).
